Tutor feedback

One girl who labels herself as "weird and awkward" took on a leadership role and helped others who did not know. She also acted as 'front of house,' giving announcements to the audience as they were entering, and asked for extra responsibilities throughout the week.

Every young person offered the opportunity for a moment of solo performance took it!

From our perspective, this has been commented on as being the best workshop to date with impact being high, and the standard of performance being better than ever. A huge success
