## Parent Feedback

"Thank you so much for having M\*\* this week, he's really enjoyed it. It's been good for him to be seen in a positive light for a change!"

"I can't believe how much she has done! As a wheelchair user most of the time, she has really pushed herself and loved every minute."

"This has been the best experience for her, she was so nervous about coming here in September but this has really alleviated a lot of her worries about secondary school."

"He has been so excited about coming every day!"

"She has never even spoken in front of an audience before. Let alone sung and danced! Well done and thank you."

## Tutor Feedback

One girl who has an EHCP for processing and anxiety was unable to complete the first day and left early, however she returned and completed the course with great enthusiasm!"

All participants were stretched and challenged (and some initially reluctant performers are now taking part in extra-curricular performing arts club in school time!)

There were 3 young girls due to attend school in September and all commented they feel less anxious about the transition. They also made friends with each other!
